DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a method for identifying tracking plurality of telecommunications customer accounts belonging to a customer of a service provider using profiles indicating customer patterns of use of the service. The profiles distinguish the account of the service provider customers from each other. Those profiles that substantially match are considered to belong to the same customer.

Prior art of record failed to teach or fairly suggest in combination the method for identifying tracking plurality of telecommunications customer accounts belonging to a customer of a service provider using profiles indicating customer patterns of use of the service comprising employing a first set of call detail information records to create a set of features for each customer in said set, where each customer is identified by one or more attributes, and where feature in said set relates to calls made by said customer to an identified telephone number, or made by said identified telephone number to said customer; employing a second set of call detail information records to create a set of features for each customer in said set, where each customer is identified by one or more attributes, and where feature in said set relates to calls made by said customer to an identified telephone number, or made by said identified telephone number to said customer; analyzing said set of features created from said first set and from said second set to associate customers in said first set with customers in said second set, where a customer in said first set is associated with a customer in said second set when a calling pattern of said customer

in said first set, as evidenced by said features of said customer in said first set, and a calling pattern of said customer in said second set, as evidenced by said features of said customer in said second set indicate, with a probability in excess of a preselected value, that said customer in said first set and said customer in said second set are one and the same customer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
